

Energy Department

1000 Independence Ave SW

Washington Dc 20585

Hello from inventor Woolls,I'm an inventor who would like to introduce Home Independence Energy Devices To The Energy Department for A intervention of build through AN Agency within the United States. Which I would like to introduce what is called the Rom-X that gives off power to run A full home At A carrybale item at A fair price to the consumer at low price as \$89.99 for A 10 year warranty,that this device will safe you onsy for any home for the next ten years cutting us off of grid's around the world it is carbon safe and Geen Hose effect's reversible within the next 17 years of use of the device.

Once the Rom-X file is conceived how how it is built how it is designed will confirm how we live with no Bill's for the next #10 #20 years with no Government Bill's no Public Bill's just A device that will change your mind about how we live as human's today..

Please let me go over this for agency reasons to build,with agencies such as Lockheed and Martin or G&E. This is A Good opportunity for A new energy device called the Rom-X that will change the American government forever...

Sincerely

Inventor Woolls
